Q. What was the main occupation of the Harappan people?

→ Agriculture.

Q. Which countries had trade relation with the Harappan?

→ Egypt, crete, central Asia.

Q. Briefly discuss the famous sculptures in Metal, Bronze and Terracotta.

Ans

Metal :→

The most outstanding work in metal is the bronze figure of a dancing girl with her right hand on her hip in a dancing posture. She is shown wearing necklaces, and her left arm is covered with bangles made of ivory or bone. Her hair is neatly fashioned in

the form of a bun & her head is tilted slightly backwards.

Stone :→ (i) The statue of a nobleman or a priest wearing a shawl over the left shoulder and under the right arm. His eyes are half closed and his beard is neatly trimmed.

(ii) A Male Torso in red stone with socket holes in the neck & shoulders for the attachment of head and arms.

Terracotta :→

The terracotta figurine of the Mother-Goddess which was found at Mohenjodaro is an exquisite piece of sculpture.

Q7. Mention any two features of script of the Harappan civilization.

Ans (i) The scripts were pictorial.
(ii) The scripts has not yet been deciphered.
(iii) Some scholars are of the opinion that the writing was in some cases right to left.

Q7. How many seals were discovered in the Harappan civilization?

Ans More than 2000.

Q7. What were the types of seals?

Ans (i) Animal Seals :- Some seals are engraved with the figures of animals - the buffalo, bull, elephant, tiger etc.

the form of a bun & her head is tilted slightly backwards.

Biology Sampa Lahiri

Tissue: Plant & Animal Tissue.

Plant Tissue.

A. Fill in the blanks —

i) _____ tissue is present at all growing parts of a plant.

ii) _____ and _____ are the conducting tissues in plants.

iii) A group of cells performing similar function is known as _____.

iv) _____ cells helps in the functioning of the seive tube cell.

v) _____ is responsible for increase in the girth/ diameter of the stem.

B. Write whether the following statements are true or false. If false rewrite the statement by changing one word only-

i) Xylem helps in food conduction in plants.

ii) The sclerenchyma consists of actively dividing cells

iii) Parenchyma tissue containing chloroplast is known as collenchyma.

iv) Cells actively divide in the meristematic tissue.

v) Parenchyma is the protective tissue in plants.

C. Answer the following questions —

1. What is meristematic tissue? Write any four characters
